

# Fenco CASH DEPOT™ ACCESSORIES

To complement Fenco's CASH DEPOT we offer a full line of add-to options, spare accessories and related components to fully utilize your CASH DEPOT to its' maximum capability. Need a base to raise your unit, we have it. If your Financial Institution does not provide Cash In Transit (C.I.T.) bags, Fenco does. If you want to add a separate non-integral bottom security locker for any purpose, you can. Our most popular items are shown below, but if you don't see what you may need, just call us. We probably offer that too.

## #CDA-TOP-CAR

WHEN TIME IS MONEY  
AND ACCOUNTABILITY IS ABSOLUTE

# Fenco CASH DEPOT™

Fenco's **CASH DEPOT** provides instant cash transaction recognition and offers significant benefits to your cash maintenance operations. Several of these benefits include real-time accountability of your locker's cash volume; daily transaction posting to your bank account; significantly-reduced reconciliation labor; virtual elimination of internal accounting errors and employee theft; reduction in armored courier fees due to cash pickups only occurring when needed; and increased security through less employee exposure to cash.

Fenco's **CASH DEPOT** lockers are a secure, cost-effective solution to your cash maintenance concerns. Fenco's original **CASH DEPOT**, designed in 2010, is still available today. Less expensive than its new Touchscreen sibling, the original CD series features a simple-to-use push button operation.

The latest version of the **CASH DEPOT** features a high resolution LCD touchscreen in place of the multifunction lighted push buttons. This model

# Fenco CASH DEPOT™

provides for additional features and allows for user-specific functions to be developed. All other features are identical to the original **CASH DEPOT**.

Regardless of which variant you choose, each locker is a uni-body, welded design featuring 1/8" thick steel. The door is 3/16" thick steel and is secured by a Medeco high-security T-Handle lock and standard alarm door contact with piezo sounder. Securing the door to the locker is a live action, 3-point bolt work for enhanced protection. Utilizing benchmark MEI Cash

Flow note acceptors, a 4-way Track II magnetic card reader, and a Windows 7 Embedded OS on a solid-state drive, the operating system is the finest available. The lockers also feature a relay board for additional configuration options, an RJ-45 network jack for high-speed data communications, and a thermal printer for receipt printing. Fully automated operational/financial monitoring is available for all variants.

## TOUCH™ SCREEN MODELS

**#CDTS-S-1CR-SCL**  
-NARROW WIDTH AND 17"D UNIT
