

**Goldline**

Provides unparalleled durability with 18-gauge, fully welded exterior, double wall construction. Available in both 18"x19" and 36"x19" footprints.

**Silverline**

Provides reliable durability with 20-gauge, spot-welded exterior, double wall construction. Available in 19"x19" and 37"x19" footprints.

**Materials and Workmanship:** All materials and workmanship are of the highest quality exceeding industry standards. Sheet steel is USA-sourced, cold-rolled, leveled, re-annealed, pickled, and oiled.

**Pedestal Construction:** Formed, welded, and ground corners ensure a rigid, seamless, unibody construction. Full-depth separating shelves provide additional compartmental security and structural integrity.

**Pedestal Base:** Fenco pedestal bases are fabricated from 16-gauge steel, with a 3" deep x 4" high toe-space. Four adjustable levelers positioned at each corner are accessible through the pedestal's interior. Designed for efficient field installation, Fenco's leveling feet allow for up to 3/4" of adjustment to properly level to counter height.

**Drawers:** Drawer bodies are made of 20 gauge steel, powder coated, and easily interchangeable for lock upgrading. Interlocking lips and metal screws allow for easy field removability of the outer front.

**Hinged Doors:** Double-panned and welded construction conceals locking mechanisms and provides secure enclosures. Equipped with riveted 3/8" Knuckle hinges, cupboard doors are swing-interchangeable in the field.

**Sliding Doors:** Sliding doors are equipped with two welded roller sheaves to glide smoothly on lower tracks, along with an upper channel guide and adjustable stabilizing bolts.

**Finishing:** Metal pretreatment includes a three-stage full submersion Iron Phosphate Wash System with a final-stage metal sealant. A dry epoxy-based industrial coating provides a 1.5 mil powder coat paint thickness with a medium gloss. Oven-cured at 385 degrees for 20 minutes. 20+ standard decorator colors are offered with custom color matching available.

**Locks:** Fenco offers a wide & ever-growing variety of locking options for drawer, cupboard, and safe compartments. Locking options range from standard disc wafer locks to financial industry-tailored removable core and electronic combination lock systems.

**Safe Locker Design:** Fenco offers many options for high-security locking compartments: Frame lockers - (3" x 1/4" collar & 1/2" solid plate doors), 1/8" full lockers (1/8" full-depth body & 1/4" solid plate doors), 1/4" full lockers (1/4" full-depth body & 1/2" solid plate doors). All Fenco safe compartments include the following security features: 3-point bolt work, combination lock, key-locking handle, welded lock channel and strike, plug-welded hinges, removable interior lock access paneling, anti-saw seam construction.

**Drawer Suspensions:** All drawers feature a threemember progressive, all steel bearing, side arm suspension with a load rating of not less than 155 lbs. Fenco drawer glides last a lifetime and are warranted the same!

**Damaged/Lost Shipments:** Please refer to our freight policy for information regarding damaged or lost shipments.

**Returns:** Returned merchandise requires prior consent and may be subject to a restocking fee. Custom products cannot be returned. All returns must be authorized by Fenco and acknowledged with an RGA # (returned goods authorization number). Fenco is not responsible for unauthorized returns.
